

The takedown closed the actor. Not your exposure.

What a victim can and cannot verify after the KillSec seizure.

ACTOR INFRASTRUCTURE
SEIZED

YOUR EXPOSURE
?

The seizure is a result about the actor.

Leak site

SEIZED

Five servers holding victim data

SEIZED

HOUSE SEARCHES

Real. And about the actor.

Source: Eurojust press release, 1 October 2026

It doesn't reach back to your data.

SET BEFORE THE SEIZURE

What was taken

Where copies went

Who has seen it

CHANGED BY THE SEIZURE

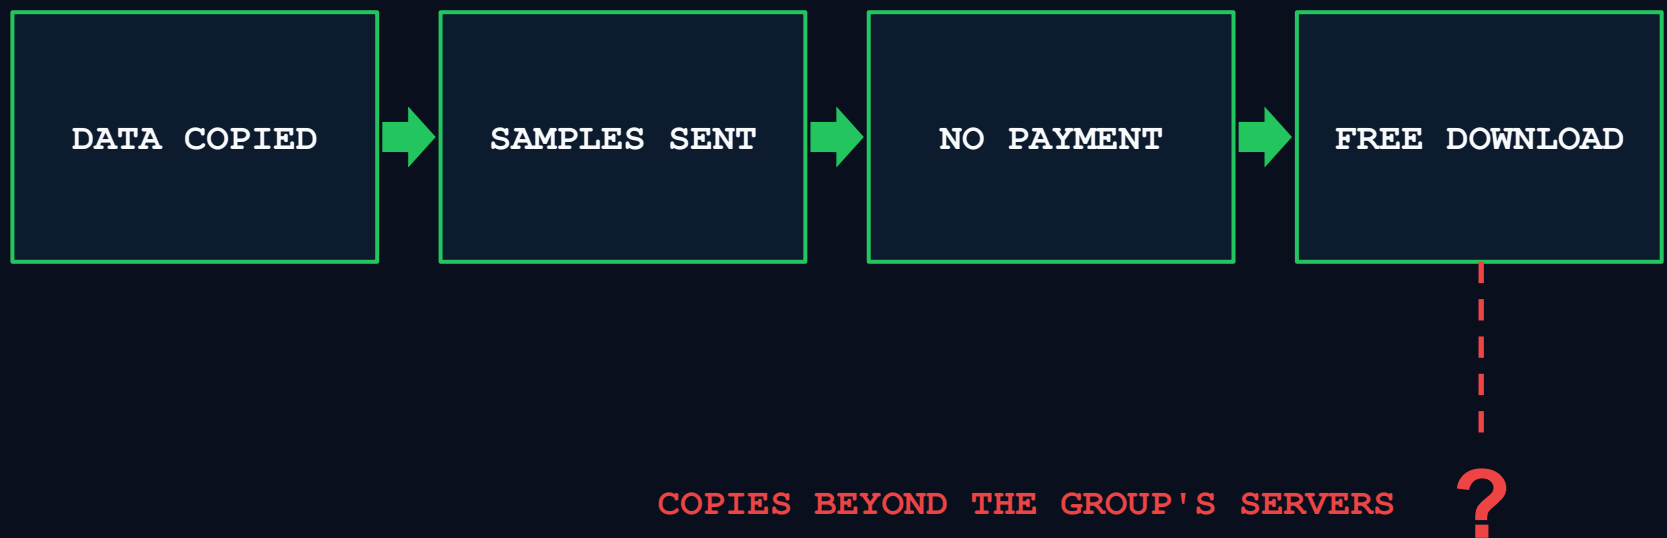

The actor's leak site

The actor's servers

Investigators' evidence

Those facts were set before 30 September.

Refusing to pay meant release.

SEIZURE: LEAK SITE AND SERVERS

Nothing here recalls a file already released.

Source: Eurojust press release, 1 October 2026

The victim list is still being written.

VICTIMS ALREADY IDENTIFIED

OTHER VICTIMS

?

OTHER ATTACKS

?

OTHER PEOPLE INVOLVED

?

Seized evidence may identify more. You can learn you were a victim from an authority, after your own record closed.

Source: Eurojust press release, 1 October 2026

The 110 TB figure is a floor.

110 TB+

AT LEAST · SECURED BY INVESTIGATORS

WHAT ANY ONE VICTIM LOST

A floor on what investigators secured. Not a measurement of what any individual victim lost.

Source: Eurojust press release, 1 October 2026

What your own evidence can establish.

Which systems communicated externally

Which data stores the compromised access could reach

Whether you have been identified as a victim

Whether your evidence supports a defined scope

CAUTION

A log gap is not a finding of no exfiltration.

What no victim can establish.

X	Who else downloaded copies
X	Whether affiliates retained copies
X	Whether released files were redistributed
X	Whether the seizure secured everything taken

That evidence sits with the actor, the affiliates and whoever downloaded.

A takedown is an intelligence event.

LOG IT AS

New information about the actor

NOT AS

A state change in your exposure record

Treating it as one substitutes the actor's status for evidence about your own data.

**Exposure closure needs
exfiltration-scope evidence. Not
attacker status.**
