Migration Readiness Record

Complete once per deployment. A blank row means the fact is unestablished.

EVIDENCE BOUNDARY

Proposed operator method, not Broadcom guidance and not a Broadcom checklist. Built from six Broadcom KBs read and re-read November 18, 2026: 461219, 438925, 312725, 444864, 460443 and 447296. Not read: the convergence article 444864, the Broadcom Product Interoperability Matrix and the 9.1.x upgrade article that KB 461219 points to.

☐ 1 Appliance and vCenter versions per site

RECORD Installed SRM, VLSR, VLR or Protection and Recovery build, and the vCenter vCenter version, at every site.

VERIFY AT
Appliance management interface; vSphere Client; Interoperability Matrix (not read here)

Each KB environment list; KB 460443; KB 461219

RECORDED _____ DATE _____

☐ 2 Protection Groups and Recovery Plans

RECORD Count of each, per site.

NOTE KB 444864's clean transition is scoped to environments with none.

VERIFY AT
Site Recovery interface

SOURCE
KB 444864

RECORDED _____ DATE _____

☐ 3 vVols-backed replications

RECORD Count, and which replications move to array-based replication before Protection Protection and Recovery 9.1.

VERIFY AT
Replication inventory

SOURCE
KB 447296

RECORDED _____ DATE _____

4 Current and replacement license assignments

RECORD Key each site holds now, the key it will hold, and its assignment state.

NOTE The term-limited key replaces existing keys and cannot be split or combined.

VERIFY AT
